CROP	INSECT PEST	RATE	CRITICAL COMMENTS
APPLES	Armoured scales, Bronze beetle, Codling moth, Mealy bugs	30 ml/100 litres with a maximum dose of 600 ml/ha	Apply at petal fall and re-apply when IFP thresholds are exceeded
	Froggat's apple leafhopper		Apply on first appearance of insects, a second application may be required later in the season. Alpasso is only effective against immature stages. Use alternative products for control of adults
	Fuller's rose weevil		Apply in November or together with DewDrop® penetrant at 50 ml/100 litres water in December.
AVOCADOS	Thrips	15 ml/100 litres or 300 ml/hectare	Apply when AvoGreen monitoring indicates the thrips threshold has been exceeded, or at the first sign of thrips damage in late summer or autumn. A second application may be necessary 3 weeks later.
KIWIFRUIT	Armoured scales	20 ml/100 litres	Make two applications, the first at greentip and the second pre-flowering.
PEACHES & NECTARINES	Thrips	20 ml/100 litres with a maximum dose of 600 ml/ha	Apply from flowering to shuck-fall when pest threshold is reached.

**DIRECTIONS FOR USE: VEGETABLE CROPS**

CROP	INSECT PEST	RATE	CRITICAL COMMENTS
ONIONS	Thrips	150 ml/ha plus 360 ml/ha Decis Forte (27.5 g/litre deltamethrin) or 40 ml/ha Cyhella® (250 g/litre lambda cyhalothrin)	Apply up to two consecutive applications once thresholds have been reached. Apply in 500 to 600 litres water/ha and ensure good spray coverage. The addition of a wetting agent is recommended.

**MIXING:** Pour Alpasso slowly through the filler screen directly into the partly filled spray tank with agitators running.

**COMPATIBILITY:** Alpasso is compatible with commonly used fungicides. Do not use with alkaline materials such as Bordeaux mixture and lime sulphur.

**It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.**

**WITHHOLDING PERIODS:** Apples - 42 days. Avocados and onions - 14 days. Kiwifruit - apply only pre-flowering. Nectarines & peaches - do not apply after shuck fall.

**RESISTANCE MANAGEMENT:** **GROUP 4 INSECTICIDE** Alpasso contains a neonicotinoid insecticide with the acetylcholine receptor agonist mode of action. Naturally occurring members of a pest population may become resistant to Alpasso and related insecticides following repeated use. These resistant populations may dominate and cause field failure. To minimise this risk use Alpasso strictly in accordance with the label instructions and follow any resistance management guidelines that exists for any insect pests listed on this label. See [www.resistance.nzpps.org](http://www.resistance.nzpps.org) for further information.

**NOTICE TO BUYER:** The manufacturer and vendors of Alpasso warrant the formulation to contain the specified active ingredients within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.
