JAZZ[®]

HERBICIDE

Contains: 500 g/litre metribuzin in the form of a suspension concentrate

**For pre or post-emergence weed control in
asparagus, carrots, lucerne, maize, lentils,
peas, potatoes and tomatoes**

NET CONTENTS: 5 LITRES

	GHS CLASSIFICATION Acute oral toxicity Cat. 4 Skin sensitisation Cat. 1 Specific target organ toxicity (repeated exposure) Cat. 2 Hazardous to soil organisms Hazardous to terrestrial vertebrates Hazardous to the aquatic environment acute & chronic Cat. 1	HAZARD STATEMENT Harmful if swallowed. May cause an allergic skin reaction. May cause damage to organs through prolonged or repeated exposure Very toxic to the soil environment. Toxic to terrestrial vertebrates. Very toxic to aquatic life, with long lasting effects.
<p>FIRST AID: IF SWALLOWED: Call the National Poisons Centre 0800 POISON (0800 764 766) or doctor/physician if you feel unwell. Rinse mouth. IF ON SKIN: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. Get medical advice/attention if you feel unwell.</p> <p>PERSONAL PROTECTION: Wash hands thoroughly after handling. Do not eat, drink or smoke while using this product. Do not breathe mist/vapours/spray. Wear protective gloves/ protective clothing/eye protection/face protection. Contaminated work clothing should not be allowed out of the workplace. Wash all exposed external body areas thoroughly after handling.</p> <p>STORAGE: Store locked up. Store in original container, tightly closed and in a dry, cool area away from foodstuffs. Store in accordance with NZS 8409 Management of Agrichemicals.</p> <p>DISPOSAL: Avoid contamination of any water supply with product or empty container. Triple rinse empty container placing rinse water in the spray tank. If recycling, discard cap and deliver clean container to an Agrecovery depot or crush and bury in an approved landfill. Dispose of product only by using according to this label, or at an approved landfill or disposal facility.</p> <p>SPILLAGE: Wear appropriate protective clothing. Exclude all bystanders from the vicinity of the spill and prevent material from entering waterways. Contain liquid spills and absorb with inert material and place in waste containers. Wash area with water and absorb with further inert material. Dispose of waste safely in an approved landfill.</p> <p>SAFETY DATA SHEET: Additional information is listed in the Safety Data Sheet available from Arxada NZ Limited or www.arxada.co.nz</p> <p>QUALIFICATION REQUIREMENTS: Persons mixing, loading, applying, or otherwise handling JAZZ must meet qualification requirements set out in the EPA Hazardous Substances (Hazardous Property Controls) Notice 2017.</p>		

PLEASE READ THE ENTIRE LABEL BEFORE MIXING OR USE. SHAKE OR STIR BEFORE USE.

WEEDS CONTROLLED: SUSCEPTIBLE: Amaranthus, barnyard grass, charlock, chickweed, fathen, field speedwell, fumitory, galinsoga, groundsel, henbit, nettles, plantains, redroot, scentless chamomile, shepherds purse, spurrey, small-flowered buttercups, stinking mayweed, storksbill, twin cress, white campion, wild radish, wild turnip, willow weed, wireweed.

MODERATELY SUSCEPTIBLE: Cornbind, sow thistle, seedling docks, seedling Californian thistle, summer grasses.

RESISTANT: Black nightshade, cleavers, docks, giant buttercup, most deep-rooting weeds and most weeds over 4 leaf stage.

DIRECTIONS FOR USE:

It is an offence for users of this product to cause residues exceeding the relevant MRL in the Food Notice: Maximum Residue Levels for Agricultural Compounds.

SITUATION	RATE/HA	CRITICAL COMMENTS
ASPARAGUS Seedling Newly transplanted Established	750 - 1125 ml / 300 litres water/ hectare 750 - 1500 ml / 300 litres water/ hectare 1500 ml / 300 litres water/hectare	Apply before crop emergence. A repeat application may be required during the season and should be directed at the base of the plants. Some tip burn can be expected with post-emergence applications, but the burning does not persist. Apply after transplanting but before fern emergence. A further application may be necessary. Apply before spear emergence. A repeat application may be made after harvest, but JAZZ must not be applied during cutting season.
CARROTS	750 ml / 300 - 500 litres water/hectare	Apply when carrots have reached the 2 true leaf stage but before the majority of weeds have reached the 4 leaf stage.
LENTILS	750ml (or 375 ml + 3 litres BRUNO) in 200 litres water / ha 1500 ml in 300 - 600 litres water / ha	Apply after sowing but before seedling emergence. Do not exceed the recommended rate of JAZZ as crop damage and yield reduction will occur.
LUCERNE	1500 ml in 300 - 500 litres water/ha	Apply during the dormant or semi-dormant period of the crop. Where perennial weeds are a problem apply. 750 ml + 1.6 litres Atrazine 50%/ha or 750 ml + 2 litres Paraquat 20%/ha. Do not apply to lucerne stands less than 9 months old. JAZZ is particularly effective for the control of Kentucky bluegrass in lucerne.
MAIZE	900 - 1275 ml + 8 litres Alachlor 50% a.i / 300 litres water/ha	Apply after planting but before crop emergence. This mixture will control annual broadleaf and grass weeds.
PEAS Field & process	750 ml in 300 - 500 litres water/ha	Apply before the crop has reached 15 cm in height and before the weeds have reached the 4 leaf stage. In situations where black nightshade is a problem, contact Arxada NZ Ltd for technical support. Do not apply to crops that are undersown, suffering disease or frost damage.
POTATOES Early crop Main crop	750 ml in 300 - 600 litres water/ha 1125 ml in 300 - 600 litres water/ha	For cool, moist conditions: Apply during emergence but before the majority of potatoes are more than 10 cm high and preferably when the weeds are at the cotyledon to 2 true leaf stage. For warm, dry conditions: Apply at weed emergence, but before the majority of potatoes are more than 10 cm high and preferably when the weeds are at the cotyledon to 2 true leaf stage. Where summer grass weeds and black nightshade are a problem use 1.5 litres/hectare. Some crop yellowing may occur where cold night conditions follow treatment and for some sensitive cultivars.
TOMATOES	750 ml in 300 - 600 litres water/ha	Pre-emergence in direct seeded crops: Apply after seeding but prior to crop emergence. If necessary repeat application after emergence. Post-emergence in direct seeded or transplant crops: Apply as a directed spray when the tomatoes have 4 true leaves and the weeds are at the cotyledon stage.

SURFACTANT: Do not add surfactant or wetting agents.

RAINFALL: Rain within 3 hours following treatment may reduce effectiveness.

COMPATIBILITY: When making post-emergence applications do not combine with emulsifiable concentrates or mix with surfactants. Do not apply fungicide/insecticide sprays within 5 days before or after application to potatoes or tomatoes.

APPLICATION: Use conventional spray equipment and apply a minimum of 300 litres of water/hectare. Maintain agitation throughout and during use.

SPRAYER CLEAN-UP: To avoid injury to subsequently sprayed sensitive crops, thoroughly flush spray equipment with several rinses of clean water.

CROP ROTATION: Because residues resulting from the use of this product could adversely affect following susceptible crops, do not plant crops other than those recommended for treatment without first sowing.

RESISTANCE MANAGEMENT: **GROUP 5 HERBICIDE** JAZZ contains metribuzin, a triazinone herbicide with the inhibition of photosynthesis at photosystem II mode of action. Naturally occurring biotypes resistant to group 5 herbicides are known to exist and others could develop. These resistant biotypes may dominate when JAZZ or other related group 5 herbicides are used exclusively. To minimise this risk use strictly in accordance with label instructions and any resistance management strategies that exist for these weeds. For further information see www.resistance.nzpps.org

NOTICE TO BUYER: The manufacturer and vendors of JAZZ warrant the formulation to contain the specified active ingredient within accepted tolerance but make no warranty of any kind on the uses of material and accept no responsibility, whether the material is used in accordance with the label directions or not.
